BUY BIGGER...

You'll Be Glad You Did!

Our #1 complaint is, "I wish I would've bought a bigger safe!"

We don't mind if you buy two safes—a His and Hers, or one Upstairs and Downstairs. But after 29 years of selling safes, our advice is simple:

Buy bigger—you'll be glad you did.

"This is my second purchase of a Liberty safe. Still using the first one since 1988 and it works perfectly just as the first day I bought it. Both are perfect in quality, operation, and dealer service. If I'm in the market for more, I wouldn't even consider any other brand."

"The magnum series being nearly the same as the presidential just seems more refined and has the old style safe look. The door, amount of bolts and size really separate this safe from the pack. I wanted a safe with at strong shell and I believe the 7 gauge steel should fit that bill nicely. Really pleased with the build and layout on this safe."
